2016 Prescription Drug List

Effective December 1, 2016

Formulary Introduction

FORMULARY

The Ambetter from Magnolia Health Formulary, or Preferred Drug List, is a guide to available brand and generic drugs that are approved by the Food and Drug Administration (FDA) and covered through your prescription drug benefit. Generic drugs have the same active ingredients as their brand name counterparts and should be considered the first line of treatment. The FDA requires generics to be safe and work the same as brand name drugs. If there is no generic available, there may be more than one brand name drug to treat a condition. Preferred brand name drugs are listed on Tier 2 to help identify brand drugs that are clinically appropriate, safe, and cost-effective treatment options, if a generic medication on the formulary is not suitable for your condition.

Please note, the Formulary is not meant to be a complete list of the drugs covered under your prescription benefit. Not all dosage forms or strengths of a drug may be covered. This list is periodically reviewed and updated and may be subject to change. Drugs may be added or removed, or additional requirements may be added in order to approve continued usage of a specific drug.

Specific prescription benefit plan designs may not cover certain products or categories, regardless of their appearance in this document. Please check your benefits for coverage limitations and your share of cost for your drugs.

Drug List Key:

Brand name drugs are listed in CAPS and generic drugs are lower case.
Drugs are covered under different copay tiers depending on your benefit:

- Tier 0** - No copayment for those drugs that are used for prevention and are mandated by Affordable Care Act. Select oral contraceptives, vitamin D, folic acid for women of child bearing age, over-the-counter (OTC) aspirin, and smoking cessation products may be covered under this tier. Certain age or gender limits apply.
- Tier 1** - Lowest copayment for those drugs that offer the greatest value compared to other drugs used to treat similar conditions. Select over-the-counter (OTC), generic or brand name drugs may be covered under this tier.
- Tier 2** - Medium copayment covers brand name drugs that are generally more affordable, or may be preferred compared to other drugs to treat the same conditions.
- Tier 3** - Highest copayment covers higher cost brand name drugs. This tier may also cover non-specialty drugs that are not on the Preferred Drug List but approval has been granted for coverage.
- Tier 4** - Coverage for this tier is for “specialty” drugs used to treat complex, chronic conditions that may require special handling, storage or clinical management. For members who do not have a four Tier plan, these drugs may be covered under Tier 3.

Prior Authorization for Non-Formulary Drugs

To obtain prior authorization for a non-formulary drug, your provider must fill out the Prior Authorization form. US Script will respond via fax or phone within 48 hours of receipt of all necessary information, except during weekends and holidays. If the request is disapproved, the notice of disapproval will contain a clear explanation of the specific reasons for disapproving the prior authorization request, or if the request was incomplete, the explanation will identify the missing material information that is necessary to complete the request.

LEGEND		
TIER	DESCRIPTION	
0	Preventative	
1	Generic	
2	Preferred Brand	
3	Non-Preferred Brand	
4	Specialty	
TYPE	DESCRIPTION	
PA	Prior Authorization	Prior Authorization required before prescription can be filled.
ST	Step Therapy	Requires trial and failure of one or more preferred products prior to coverage.
GL	Gender Limit	Drug is limited to specific gender.
AL	Age Limit	Drug is limited to specific age.
MDD	Max Daily Dose	A limit on the number of times the drug can be taken per day.
MPL	Max Package Limit	A limit on the amount of drug covered per prescription.
MFL	Max Fill Limit	There is a limit on the number of times this drug can be refilled.
MDS	Max Days Supply	There is a limit on the amount of this drug that is covered.
S	Specialty Drug	Specialty drugs are high-cost drugs used to treat complex or rare conditions, such as multiple sclerosis, rheumatoid arthritis, hepatitis C, and hemophilia.
FAL	Female Age Limit	This prescription drug may only be covered if you are a female and meet the minimum or maximum age limit.
MAL	Male Age Limit	This prescription drug may only be covered if you are a male and meet the minimum or maximum age limit.
MDS2	Max Days Supply	There is a limit on the amount of this drug that is covered.
